1) What's the Big Idea?: FEUDALISM. E. & J. movement between centralized and decentralized power systems depending on whether we are early or late in the timeframe. (economically, politically, socially)

Europe:

Japan:

2) Show relationships (cluster documents). In docs 1 & 2 both Japan and Europe has similar vassal relationships with an exchange of loyalty to serve for material support with a hierarchy of power and prestige. . . . and in docs 4 & 10 the legal aspect of European feudalism is contrasted with the greater emphasis on honor in Japanese feudalism.

3) Understand Doc. Ex. doc 10--Magna Carta

3) Understand Doc. Ex. doc 10--Magna Carta

4) Doc 8, Way of the Samurai, discusses how important the code of conduct known as bushido was and Shintoism and Confucian influences are evident. A copy of the Ten Commandments of Chivalry would indicate a similar commitment to moral behavior rooted in beliefs, with Roman Catholicism determining sanctioned conduct for European knights.

5) Why similarities/differences??? Both E. & J. experienced feudalism because they responded to a power vacuum with conflicting powerful lords attempting to eliminate competition. Feudalism ended in E. because new technological innovations made knights obsolete as nation states emerged as seen in the 100 Years War between England and France in doc 9. In Japan feudalism ended when shoguns were able to control the daimyo and their samurai with the emperor delegated to a figurehead role.
